Description:

The Club3D senseVision MST Hubs utilize Multi Stream Transport, a unique DisplayPort™ 1.2 feature that creates the ability to transport multiple independent uncompressed display (and audio) streams over a single cable, supporting protected content and high performance applications such as 3D gaming. This enables the use of multiple monitors connected by MST hub configuration. The Club3D MST Hubs is able to distribute those video streams to the connected screens. The Club3D MST Hubs do not increase the bandwidth of DisplayPort™ 1.2 outputs, but it enables the optimal use of it.

The CSV-6400 is Plug & Play and does not require any driver installation.

Note: When using a DisplayPort™ 1.1 video card the MST hub will act as a splitter, automatically mirroring your video source across all displays. Resolution limitations apply, for DisplayPort™ Alternate Mode. The Club3D MST Hubs do not increase the bandwidth of DisplayPort™ 1.2 outputs, but it enables the optimal use of it.
